Footwear-Sanitizing Mats

Mats hold disinfectant to clean the bottom of the shoe as users move across the mat. Edges around the mat create a well to contain disinfectant while the mat surface removes dirt.

Footwear-Sanitizing Mats have a well to hold disinfectant that cleans footwear before entering sensitive areas, such as research, food processing, and pharmaceutical spaces. They are often used with a dryer mat to keep floors dry and prevent slips and falls.

Multizone Footwear-Sanitizing Mats are complete systems with either two or three sections.

Two-Zone Mat—Sections have a well to sanitize and an area to dry footwear.

Three-Zone Mat—The first section scrapes dirt and debris. The second zone has a well that holds disinfectant to sanitize the sole of the shoe. The last zone has a mat that dries the shoe before entering the area to keep the floor dry and prevent slips.

Adhesive-Backed Multizone Footwear-Sanitizing Mat includes a drying mat to keep floors dry and prevent slip and falls. The sanitizing mat sits on top of the drying mat to keep the surrounding floor dry. It can be picked up, cleaned, and refilled. The drying mat absorbs leftover disinfectant to keep the floor dry to prevent slips and falls. An adhesive backing on the drying mat keeps the mat in place and prevents the mat from buckling.

Replacement Mat Inserts work with NoTrax Two- and Three-Zone Sanitizing Mats.

Sticky-Surface Floor Mats and Frames

■ Polyethylene film sheet material

Disposable sticky-surface mats remove dust and other contaminants from the bottom of shoes and wheeled carts. Contaminants stick to the mat without leaving a sticky residue on the shoe. They are placed in front of doors leading to areas with high requirements for cleanliness or where workers are leaving areas with construction dust and debris. **45MT83** and **45MT84** are ISO Cleanroom Class 5 rated.

Antimicrobial mats prevent the growth or spread of bacteria, fungi, and viruses. **Framed** options allow the mats to be moved to a new location.

Floor mat frames are reusable and hold pads of sticky-surface floor mats. They reposition more easily than those without frames.
