\* Include coupling link. † 100 ft bulk pack.

## Tamper-Evident Seals

**Security seal presses** crimp the wire on lead and wire seals. Crimping the wire provides a more secure seal than soft wire, allowing the seal to secure doors, containers, and other applications where tamper resistance is required. Once crimped, the seal can't be opened without detection.

**Lead and wire seals** provide tamper evidence if broken, making them ideal for light security and loss prevention in agricultural, law enforcement, storage, and utilities applications. They're placed on water meters, drums, and hoppers and are sealed by passing the wire through the metal disc, then crushing the disc with a press.

**Lead and wire seal components** replace used or broken elements from lead and wire seals.

For Use With	Body Material		L	Brand	Item No.	Pkg. Qty.
Sealing Presses						
Lead and Wire Seals	Nickel, Rubber	6 ½ in	—	1F132	1	
Lead and Wire Seals	Steel	5 ¾ in	Brady	20TL23	1

Wire Seal	Stainless Steel	Not Required	—	2CEC6	100	
Wire	Annealed Steel	Not Required	C.H. Hanson	3YYP7	100	

## Stencils

Easy-to-use stencils provide clear and legible warnings, precautions, and signs. Can be used with a variety of spray or brush-on paint.

**Brass and Plastic Interlocking Stencil Sets**—Each stencil has edges that are designed to connect and interlock with adjacent stencils for consistent spacing. They may be reused many times and hold up in a variety of environments.

**Plastic Safety Stencils**—Flat, reusable stencils that feature symbols, messages, or both. They create hazard messages on surfaces by allowing the paint to mark in a specific pattern, text, or image. Light duty.

**Plastic Message Stencils for Traffic and Parking Control**—Rapidly mark parking lots, driveways, and driving surfaces with vehicle traffic. They have a preconfigured message cut out of them, reducing the time it takes to make this marking repeatedly. Light duty.
