

## Emergency Combination Drench Shower and Eye/Face Wash Stations

■ Meet ANSI Z358.1-2014

Feature SpinTec showerheads that provide a more even spray pattern, stay-open ball valves, and identification and inspection tags.

**Halo Models**—Space-saving design provides maximum wash-down coverage and spray pattern. Designed with an ergonomic stainless steel push handle that can be reached from any direction. Integral strainer reduces debris and reduces clogging.

**Classic Models**—Include PVC push handles.

**Barrier-Free Stations**—Shower pull-handle and eyewash bowl extend to accommodate people with physical disabilities.

**Halo Heat Trace Stations**—Heat Trace cable protects units from freezing temperatures to -50°F. Include shower temperature control thermostat, freeze protection valve, and power indicator light.

**Accessory**—3-ply vinyl privacy curtain is mildew-resistant and measures 70"L x 145"W.

## Emergency Combination Drench Shower and Eye/Face Wash Stations

■ Meet ANSI Z358.1-2014

Units provide both drench shower and eye/face wash or eyewash. Innovative AXION MSR eye/face wash head uses an inverted directional laminar flow to wash contaminants away from the nasal cavity. Hydrodynamic showerhead design helps maintain equal distribution of water through the entire footprint of flow. Chrome-plated brass stay-open ball valve features stainless steel ball and stem. Self-adhesive high-visibility safety green and bright yellow stripes and a universal sign are included.

**Heat Trace Station**—Can operate down to -30°F. Features 3/4" insulation, ABS jacket, thermostatically controlled 120VAC electric heat cable, and automatic thermal actuator to help prevent freezing. CSA Certified to ANSI Z358.1, Type 4 Electrical.
