**BRK** **Kidde** **FIRST ALERT**  
**Carbon Monoxide Alarms**

■ UL 2034 Listed

85dB horn sounds when sensor detects high levels of CO. Select models feature visual alert when alarm needs replacement. Operating temp.: 40° to 100°F.

**Battery-Powered CO Alarms**—User-friendly detectors have easy-access battery compartments. 3YNJ3 has a battery lockout system.

**Plug-In CO Alarms**—6AJW6 has tamper-resist feature that sounds a constant alarm if unit is unplugged or comes loose from wall outlet. 2FTN5 and 20JK12 include a 6-ft. extension cord for table or shelf mounting.

**Plug-In Combination CO and Explosive Gas Alarm**—Unit also detects methane or propane gas. Includes extension cord for table or shelf mounting.

**Interconnectable CO Alarms**—When interconnected with smoke alarms, 1XTH1 and 1XTH2 feature two different sounding patterns to differentiate smoke and carbon monoxide warnings. 2FTN2 features latching alarm indication and a locking mechanism to prevent theft of battery or unit.

**SAFEAWAKE**  
**Smoke Alarm Aid**

SafeAwake Smoke Alarm Aid works in tandem with, and is activated by traditional, audible smoke alarms to improve fire safety for elderly and hard-of-hearing populations. When an alarm sounds, the SafeAwake is triggered to flash a bright light and set off its own loud, low-frequency audible alarm that can be heard by the hearing impaired. It also sets off a motorized bed shaker to wake up slumbering residents. Easy setup makes it an excellent choice for homes, hotels, hospitals, senior residences, and independent and assisted living facilities. With automatic shutoff and restart, turn-on indicator light, test button, and battery backup (batteries included). UL Listed.
