FIRESTOP 3M

Fire Barrier Products

Pillows and Self-Locking Pillows—STI brand pillows are lightweight and intumescent on all sides. Reinstallable for fast, convenient retrofitting of cables. UL Classified and FM Approved.

3M brand self-locking pillows have strips that adhere to each other to make overhead installation easier.

Composite Sheets—Fire-stop large openings through fire-rated walls and floors with multiple penetrations. Anchor sheets to the wall or floor with common tools. Cut to fit irregular shapes. Can fire-stop openings up to 36 sq. ft. STI brand sheets are lightweight for easy handling and fabrication.

Mortar—Use for filling large openings in concrete floors and walls. Nonshrinking; can be poured, pumped, or troweled. Will not crack due to temperature fluctuations. STI brand yields approx. 1250 to 1425 cu. in. 3M brand yields approx. 697 cu. in. UL Classified except 4MM45.

Wrap Strips, Duct and Plenum Wrap—Use wrap strips to fire-stop metallic and nonmetallic pipes, insulated pipes, and cable bundles. Duct wrap protects both grease and ventilation ducts. UL Classified except 1XTJ1 and 3BE40. Plenum wrap protects plastic pipe.

Plugs—Intumescent fire-stop plugs temporarily or permanently seal metallic conduits or conduit sleeves from the inside, through gypsum or concrete/masonry walls. Install with no special tools required. UL Classified.

Pipe Collars—Intumescent devices expand during a fire to help close off plastic pipe that penetrates fire-rated walls and floors. Seal off burning ABS and PVC pipes, both solid and foam core, as well as CPVC, PVDF, and FRPP pipes. 3-hr. fire rating. 3BE43 and 3BE44 are UL Classified.

Accessories—Mineral Wool Board 3BE69 provides high-temperature thermal control and fire resistance. Foil Tape 4MM48 and Metal Restraining Collar 4MM49 are for use with STI brand wrap strips. Use 4MM48 for tuck-in installation; for external mounting, use 4MM49.

Packing Material 1XRT3 is for use around metallic, nonmetallic, and insulated pipe; UL Classified.
