

Type II Safety Cans and DOT Transport/Dispensing Cans

Galvanized steel safety cans with leaktight, self-closing spouts provide temporary storage of flammable liquids such as gasoline (red), kerosene (blue), diesel (yellow), and oil (green). Feature ergonomic, all-steel handle, flexible metal hose, automatic vent, and flame arrestor. Chemical-resistant, high-gloss powder-coat finish.

Type II Safety Cans—Cans have two openings for filling and pouring and a trigger release cap.

- FM Approved, UL and C-UL Listed, TUV Certified

Type II Safety Cans with AccuFlow—Vented AccuFlow manifold provides superior pour control and precise smooth flow. Features easy-trigger handle, 3/2" stainless steel flame arrestor, and quick-open port with ergonomic lift handle. Warning label with extra-large ID zone identifies contents.

- FM Approved, UL and C-UL Listed, TUV Certified

Type II DOT Transport/Dispensing Cans—Specifically designed for applications requiring DOT/UN compliance. Roll bar construction protects the fill and pour mechanism from damage. Dual fusible-link bracket guards against spillage and vapor release during transport. 100% leak tested.

- Meet DOT requirements
- FM and UN Approved

Safety Can Spill Tray—Large diameter surface supports safety cans up to 5-gal. capacity.

- Meet OSHA and NFPA Code 30 Standards
- Carb Compliant

Hazardous Liquid Safety Cans

- Meet OSHA Standards
- FM Approved

24-gal. galvanized steel cans with red powder-coat finish are used for general purpose solvents. Polyethylene cans are used with corrosive liquids or alcohol. Plunger and bench cans feature dasher plate to keep contents from ignition sources.

Plunger Cans—Permit fast, easy moistening of cleaning cloths when applying solvents to parts. Surplus liquid drains back into reservoir. Eagle brand models include brass plunger assembly. Justrite models have Ryton and brass plunger assembly.

Bench Cans—Ideal for easy cleaning of small parts in solvents. Eagle brand models feature spring-loaded, perforated dasher plate. Justrite brand models feature steel dasher plate that serves as an effective flame arrestor. Hinged cover minimizes evaporation loss.

Solvent Can with Tray—Portable, leaktight can features spring-loaded, self-closing lid. Controls VOC emissions and cleaning agents. Accepts standard long cotton-tipped applicators and small cleaning utensils. Tray makes it easy to carry to point-of-use.

- Meets EPA 40 Requirements
