**3TCH4**

**Oily Waste Cans**

Available with foot- or hand-operated covers; countertop models are also available. Lid opens to a restricted angle and is self-closing to minimize the risk of spontaneous combustion.

**Polyethylene**—Impact-resistant noncorrosive polyethylene is impervious to many liquid chemicals, solvents, and corrosives.  
■ Meet OSHA Standards

**Galvanized Steel**—Durable, chemical-resistant construction provides extended service life. Red and yellow cans have a powder-coat finish; silver cans have a clear-coat finish. E6819 through E6822 feature a SoundGard lid with specially designed, sound muffling pad to reduce annoying lid closure noise. Ideal for quiet environments.

- UL Listed, except 4KPX1 and F0097
- FM Approved

**3NKN4**

**3NKJ4**

**Safety Containers for Laboratory Environments**

**Laboratory Faucet Cans**—Self-closing faucet provides safe dispensing. Fill spout has pressure-relief cap with flame arrestor. 5-gal. models include a built-in vacuum breaker. Brass faucet, except 3NKU4 faucet is stainless steel. Cans are shelf-mounted with a bottom-mount faucet, except 3NKU4, 3NKJ4, and 3NKJ9 faucets are located on the top.

- FM Approved
- 3NKJ4 is UL Approved

**Self-Close Acid/Corrosive Safety Cans**—Store acids and caustics. Spring-close cap provides tight seal. Containers are marked in liters, quarts, and gallons for accurate filling and dispensing.

**Bottle Safety Jacket**—Protects 4L and 1-gal. glass bottles from breakage. Bottle fits into bottom half of cover, and lid twists securely for safe pouring.

**Dispensing Squeeze Bottles**—Feature stainless steel wire with shapable stem that dispenses a fine, targeted stream of flammable liquid directly onto or into small objects and allows access to hard-to-reach areas.

**Dispensing Bottles**—1-handed brass dispensing valves are leakproof and self-closing. Body is textured and shaped for a firm grip.

\* Includes metal stand. † Includes faucet for heavy industrial use. †† Includes smaller faucet for dispensing in laboratories.

**Grounding Wire**

Terminated bonding and grounding wire come with clamps or clips attached at the ends to secure the wire to grounding surfaces. They help prevent buildup of static electricity to prevent damage to equipment and reduce the risk of electric shock to workers. Coiled wire retracts when not in use.
