Oil-Only Loose & Granular Sorbents

Powdered materials clean up and absorb oil-based liquid spills on floors and uneven or cracked surfaces. Once the liquids are absorbed, the material can be swept up.

Harsh Chemical Sorbent Pads & Rolls

Absorb and clean up harsh chemical liquid spills like sulfuric acid, hydrochloric acid, or sodium hydroxide. These sorbents won't degrade or react when in contact with harsh chemicals. Pads fit under and around machinery, and they soak up spills on workbenches, walkways, or floors. Pads and rolls with coverstock have an additional layer that increases durability and reduces linting.
