Harsh Chemical Sorbent Socks & Booms

Surround harsh chemical liquid spills and prevent them from spreading. Tubular, flexible socks and booms conform to many shapes and absorb spills on uneven surfaces.

Harsh Chemical Sorbent Pillows

Soak up acids, bases, and unknown chemical spills. Pillows have a larger surface area and higher capacity than pads, rolls, and socks, so they absorb more liquid and help minimize slips and falls. 30RC89 neutralizes acids, bringing pH levels to 7 or neutral. Its color changes to indicate the presence of acid and when the pillow is safe to handle.

Harsh Chemical Loose & Granular Sorbents

Neutralize harsh chemical spills like acids, bases, or aldehydes. These sorbents are sprinkled over chemical liquid spills and can be swept up once the spill is absorbed.
