Jersey Barriers

- Diamond reflective grade
- Accept a barricade light

Interlocking Jersey barriers fill with sand or water to provide a more secure barrier than other barricades. They are generally used for long-term applications and are less portable than folding barricades.

W x H	Empty Weight	Weight When Filled with Water	Body Material	►CHOOSE: Color	Item No.
62 1/4 in x 24 in	35 lb	552 lb	Plastic	Green, Orange, White, Yellow	J2254
69 3/4 in x 33 3/4 in	55 lb	1,336 lb	Plastic	Green, Orange, White, Yellow	J2255

**Yellow

Barricade Signs

- Reflective
- Accept a barricade light

Plastic A-frame signs attach to a compatible barricade to communicate a message to drivers and pedestrians. All signs can be filled with sand for extra stability. Fold for easy storage.

Raised Pavement Markers

- Installation Surface: Asphalt; Concrete
- Pkg. of 100

Markers protrude from the pavement surface to call attention to lane changes and hazards. Reflective surfaces make the markers visible in low-light and limited-visibility conditions. The markers make noise

and have a rumble effect when a vehicle crosses over them. For markers that don't include Pressure Sensitive Adhesive (PSA), go to Grainger.com for epoxy adhesive options.

Pavement marker adhesive pads temporarily attach markers to pavement.

Curb Markers

- Installation Surface: Asphalt; Concrete
- Pkg. of 200

Reflective curb markers install on raised edges of medians, curbs, and islands to make drivers aware of the edge. A lens reflects headlights back to the driver to make markers visible at night and in low-light conditions.
