Plastic Spill Deck 45Y282

Inline Plastic Spill Deck 4LNU7

Plastic Spill Deck with Overflow Bladder 3VAR2

Plastic Spill Containment Decks/Platforms

- Support EPA Compliance 40 CFR 264.175
- Support SPCC Compliance, except 45Y280 to 45Y283
- Black grate color

Plastic Spill Decks—Suitable for standalone use with small drums and containers. These decks can be connected with other pieces to share spill capacity between units to make a complete EPA-compliant unit for holding 55-gal. drums.

Inline Plastic Spill Decks—Save floor space and make drum and container handling easier. These decks are commonly used where storage against a wall is preferred.

Plastic Spill Decks with Overflow Bladder—Low-profile saves floor space and makes drum and container handling easier. They are connected to a spill-deck sump that has an overflow bladder that automatically unfurls to provide additional spill containment.

Plastic Ramps & Bladder for Spill Decks/Platforms

Ramps contain spills and allow for the loading and unloading of large tanks and storage drums. They connect to spill decks/platforms and make loading and unloading drums and containers easier while also helping to minimize injuries.

Flexible plastic replacement bladder is an attachment that increases sump capacity to ensure spill decks/platforms are EPA and SPCC compliant.
