# Spill Containment Dikes

▪ Support SPCC Compliance, except for 6DMY1 and 6DMY2

**Spill Dikes** are used to form a temporary barrier to contain spills. They are modular in construction and have interlocking components.

**Spill Dike for Smooth Surfaces 3EWX2**

**Spill Dike for Rough Surfaces 3EWX5** features a tacky bottom layer that seals tight to rough surfaces.

**Doorway Barrier Dikes** create a barrier to contain chemicals and liquids. They fit most doorways and are easy to install.

**Spill Dike for Rough Surfaces 30PW61**

**Tabletop Spill Dikes** contain spills on workbenches or in labs. Have a low-profile for small spills on smooth surfaces. Polyurethane material resists water, oil, and many chemicals.

**Drive-Over Spill Dikes** create a flexible and leakproof barrier that contains leaks and diverts stormwater. Can be driven over and are built with a skin that withstands heavy traffic and resists UV rays. Urethane bonds to concrete and smooth surfaces without adhesive.

**Doorway 30PW58**

# Plastic Spill Containment Sumps/Basins

Hold drums, tanks, or other liquid-filled containers. Sumps have a durable, polyethylene construction that will not rust or corrode. Capture unwanted leaks and spills.

**Outdoor Spill Containment Sumps**—Have a hard-top cover that protects contents from the elements.

**Dolly**—For transporting Eagle 3KN25 and 3KN26. Features welded construction with 4 swivel wheels. Note: Products do not include any pictured containers.
