

## Indoor Carpet Entrance Mats

Combine mats to create a zoned entrance system that protects floors and reduces slip hazard by removing dirt, debris, and moisture from footwear.

**Rubber-backed mats** have cleated backing to reduce mat movement, and molded beveled edging that creates a retention dam to trap moisture. **Vinyl-backed mats** reduce mat movement, and have beveled edges to help minimize tripping.

### HEAVY-TRAFFIC

**Barrier Rib**—Durable, antimicrobial, 26-oz. crush-resistant mat has a molded dual-ridge/cross-rib pattern and carpeted beveled edges for maximum scraping and debris.

**Arrow Trax**—Chevron design provides nondirectional scraping and moisture retention. 38 oz. of yarn per sq. yd.

**Estes**—High/low, dense-tufted 33-oz. berber provides excellent water retention.

**Uptown**—High/low, looped-pile, upscale carpet retains moisture with 40 oz. of tufted, crush-resistant Decalon yarn per sq. yd.

### MEDIUM- TO HEAVY-TRAFFIC

**Guzzler**—High/low, crushproof waffle design and rubber-edged perimeter provide superior water and soil control, with a low profile to fit under narrow clearances. 26 oz. of yarn per sq. yd.

**Portrait**—Tri-rib, high/low parquet design provides nondirectional scraping as traffic passes from all directions. Low profile is good for narrow-clearances. 26 oz. of yarn per sq. yd.

**Dante**—Densely tufted cut-pile Decalon construction features 24 oz. of tufted yarn per sq. yd.

**Heritage Rib**—Heavier-weight, double-rib high/low design provides extra moisture retention and scraping action. 24 oz. of yarn per sq. yd.

### LIGHT- TO MEDIUM-TRAFFIC

**Sabre Decalon**—Mat offers good moisture and grime retention. 19 oz. of colorfast Decalon yarn affords functional service and easy cleanup.

## Scrape & Dry Indoor Carpet Entrance Mats

Ideal for handling medium traffic at large entrances, this color-coordinated runner combines three functional mats into one design. The first zone features a looped, nonabsorbent yarn to scrape debris and moisture from foot traffic. The second zone combines looped scraper yarns with absorbent looped pile to begin the drying process. The third zone consists of looped pile to complete the drying function. Nonslip vinyl backing. Beveled edges minimize tripping.
