## Wildland Firefighting Tools

Tools perform tasks required to combat wildland fires. They're made of fire-resistant materials to protect against damage caused by contact with high heat. Tools help firefighters create fire breaks, put out smoldering flames, and remove branches in danger of igniting.

Handle Length	Handle Material	Overall Length	Head Weight	Handle Color	Brand	Item No.
<b>Rakes</b>						
<b>Fire Rake Head Type</b>						
60 in	Fiberglass	5 ft	1.94 lb	Yellow	Nupla	2LTC4

## Wildland Fire Hoses

- Polyester single jacket
- Aluminum fittings
- Polyurethane tube material

Hoses are lightweight so they can be carried across rugged terrain by a single individual. They are less durable than standard fire hoses to reduce weight. Find more information for Fire Hoses on page 1874.

## Forest Fire Shelters

**Fire shelters** cover a firefighter to protect against burns when they become trapped behind a fire line. They cover themselves with the shelter until it's safe to emerge. **Training fire shelters** allow firefighters to learn how to use a shelter and become accustomed to setting them up for use. They do not protect firefighters in an actual fire.

Size	For Firefighter Size	Color	Open Length	Open Width	Open Height	Item No.
<b>Fire Shelters</b>
