

**Floor Marking Tape Type Definitions**

**Extra-Durable**—Designed to withstand environments with heavy traffic and moving equipment. This durable, abrasion-resistant tape works well for long-term floor marking, and maintains its vivid color even after exposure to pallet-dragging and forklift movement.

**General Purpose**—Used to designate lanes in environments with light to medium traffic flow. It's also useful for marking areas on walls or to show protruding hazards.

**Message**—Includes printed messages on the tape to alert personnel of hazards, inform them of restricted areas, or remind them to wear protective gear. Messages are printed repeatedly along the length of the tape in high-contrasting bold lettering for easy visibility.

**Glow-In-The-Dark**—The material in this tape has photoluminescent properties that provide a bright, long-lasting afterglow in the event of a power outage and loss of light. This tape ensures that walkways, steps, door frames, and handrails are visible so personnel can safely exit a building.

**Reflective**—The material in this tape reflects light to provide visibility in low light areas. This tape is useful in designating walkways, highlighting surfaces in loading docks, and ensuring visibility of protruding objects.

**Textured Grip**—Features a raised pattern on its surface to provide extra traction to prevent slips and falls. It is useful in designating walkways, marking hazards, and indicating where items should be placed. This tape removes cleanly after it's applied and is useful in busy facilities with foot traffic.

**Freezer**—Used in walk-in freezers or cold storage facilities. It can be applied at freezing temperatures, eliminating the need to defrost the freezer prior to application. This tape is thicker than general purpose floor marking tape and removes cleanly after it's applied.

**Extra-Protective Overlamine**—This clear tape is made of a durable overlamine for applying on top of floor marking tape. It provides an extra layer of protection against wear and tear while ensuring that the messaging and bright coloring of marking tape stays visible.

**Floor Marking Tape**

These continuous rolls of floor marking tape are used in facilities such as warehouses and factories. The tape backing material is vinyl for all brands except Brady, which are Polyester. Tape adhesive material is rubber for 3M, Mighty Line and Brady products.
