Trilogy Networkx Networking Locks, Grade 1

- Key for manual override
- Weather-resistant; Operating temp.: -31° to 151°F
- Brushed chrome finish

Networked door access control systems eliminate door-to-door programming and audit trail retrieval by communicating wirelessly via 802.11B/G or Ethernet. No wires to run and no access panel or power supplies to install. Feature automatic schedules, event logs, and support for 2000 doors and 5000 existing proximity ID cards/badges.

PIN/ID CARD CONTROL

Programmable Locks 24U106 to 24U113 have built in HID proximity card reader, full-metal digital key pad, integral bidirectional radio, batteries, and serial number ID card. Starter Kit 24U117 includes NET-DKPAK and NET-PDKPAK controller and keypad. Keypad 24U119 supports 3 to 6 digit numeric PIN codes and prox ID card users (virtually all HID format proximity technology ID cards, fobs, and credentials).

CODE ONLY

Programmable Locks 24U108 to 24U110 have full-metal digital keypad for code only use. Starter Kit 24U116 includes NET-DKPAK and NET-PDKPAK controller and keypad. Keypad 24U118 supports 3 to 6 digit numeric PIN codes.

ACCESSORIES

Control Panel 24U120 includes circuit board with onboard flash memory and 12V power supply with transformer and rechargeable back-up battery. Supports 2 of any combination of NETDK or NETPDK keypads plus 2 Wiegand devices. Special 2-door mode allows 2 keypads and/or 2 Wiegand devices to separately control 2 doors. Ceiling or wall mount. 1 antenna and 6VAC transformer included.

Trilogy Keyless Electronic Control Locks, Grade 1

- Key override; standard core (included) or SFIC cylinder (not included, sold on Grainger.com)
- Operating temp.: -31° to 151°F except 3ZM80, 3ZM83, and 3ZM81

Easily replace keyed locks with these electronic access control locks. Compatible with most doors that have a standard knob set. Fingertip-programmable keypad allows up to one hundred 3- to 5-digit codes. DL2700-series locks can create a 3-tiered hierarchy of custom codes: 1 master, 10 managers, 90 standard codes, and three 1-time-use codes. Low battery alert. Include 5 AA batteries (up to 150,000 cycles), except 3CCK6, which includes 2 lithium batteries (80,000 cycles). Double-sided models are for code control on both sides of the door.
