## Vocational Hands-On Training Systems

These panels allow students to learn, practice, and develop their job skills through this hands-on process. Each system includes hands-on training panels, student workbooks, printable PDF PowerPoint Presentations, and instructor guidebooks. For the engineering, maintenance, service, and technical fields.

## Safety Training and Reference Materials

Materials are used to maintain regulatory compliance, help improve productivity, and ensure safe working conditions. They provide quick reference through new pictograms and a safety data sheet (SDS) format for physical, health, and environmental hazards required by the HazCom GHS system.

**Book/Booklets**—Provide information to help your employees navigate HazCom 2012/GHS's classification and labeling standards.

**Posters and Wallet Cards**—Easily convey the pictograms and safety data sheet (SDS) format for physical, health, and environmental hazards required by the HazCom Globally Harmonized System (GHS). Poster 45H627 includes a training card.
