

**Electrical Lockout Devices**

**Universal Plug Lockouts**—Accommodate various cord diameters and high- and low-voltage plugs.

**Small/Large Plug Lockouts**—Devices accept lock or nylon tie to prevent a plug from being inserted in a wall outlet. 3VAF2 can be used to lockout pneumatic male fittings attached to compressed air hoses.

**Plug Prong Lockouts**—Use with existing lockout padlocks or lockout hasps with built-in lock.

**Cinch Sack Plug Lockouts**—Designed for oversized, awkward, and hard-to-reach connections. Accommodate up to 6 padlocks.

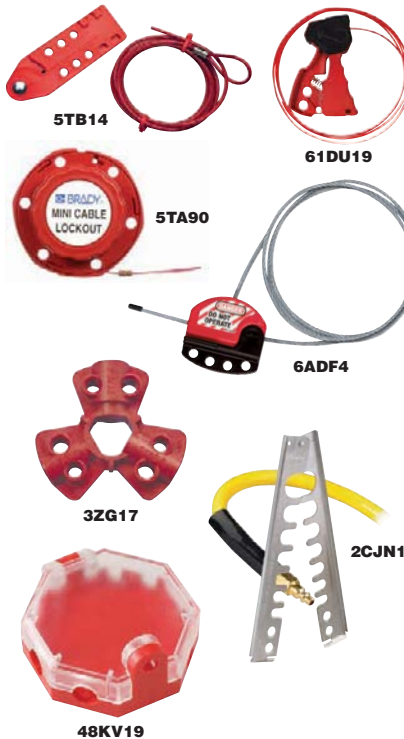

**Wall Switch Lockouts**—Hinges open for unobstructed operation of switch.

**Emergency Stop Safety Covers**—Install over push/pull or twist/release emergency stops.

**Push-Button Safety Covers**—Completely cover button to prevent access.

**Cable and Pneumatic Lockouts**

**Tab- and Grip-Cinching Cable Lockouts**—Cable cinches tight to provide better security than chains. 3MT22 allows you to squeeze device to tighten cable, then insert your padlock to secure the handle. 5TA71 has a built-in loop to keep cable coiled for easy transport and storage.

**Retractable Cable Lockouts**—Self-winding mechanism automatically cinches the cable with the push of a button.

**Adjustable Cable Lockouts**—Flexible for use on side-by-side gate valve lockouts or multiple circuit breaker panels at the same time.

**Pneumatic Lockouts**—Isolate pneumatic devices without installing in-line lockout valves. No. 2CJN1 works with lockout hasps for multiple worker lockout.
