BRADY Master Lock

Valve Lockouts

Gate Valve Lockouts—Fit most round-handle gate valves. Nonadherent plastic construction resists chemicals and hot/cold temperatures. Brady models' knockout feature accommodates OS&Y or "rising stem" gate valves.

Adjustable Ball Valve Lockouts—3TAP3, 2VU39, 3TAP1, and 3TAP2 can also be used to lock valves open on pipes from 1/2" to 1 1/4" dia. 4EMY9 lockout is suitable for tight locations near pipes.

Universal Ball Valve Lockout—Pouch-style with strapping and locking mechanism. Design removes handle and conceals valve stem, eliminating reactivation.

Standard Ball Valve Lockouts—Designed for locking out quarter-turn ball valves with flat "dog-leg" handles. 1-pc. devices fit all major brand ball valves.

Universal Valve Lockouts—Single device locks out most ball, butterfly, and gate valves. Industrial-grade steel and nylon construction is chemical- and corrosion-resistant.

Plug Valve Lockouts—Compact and easy to use, effective for difficult-to-secure plug valves. Fit most manually-actuated plug valves. Durable and tamper resistant.

Butterfly Valve Lockouts—Solvent- and chemical-resistant. Resist cracking and abrasion.

Gas Valve Lockouts—Protect against accidental valve opening. 2CJN2 fits all pressurized gas valves up to 3" dia. and works with valve guard in place.
