

Door Closers

- Max. door opening up to 180°
- Includes self drilling screws and hardware

Closers have cast iron cylinders, forged steel arms, all-weather fluids, and double heat-treated pinions that help provide long life cycle. Powder-coated finish. Self-tapping/self-reaming screws, and peel-and-stick templates help ensure accurate installation.

1261 Series can be mounted hinge side, top jamb, or parallel arm on either right or left swinging doors. Nonsized cylinder is adjustable for interior doors to 4 ft. 6" and exterior doors to 3 ft. 6". Does not include cover.

1461 Series can be mounted hinge side, top jamb, or parallel arm on either right or left swinging doors. Nonsized cylinder is adjustable for

LCN®

interior doors to 5 ft. and exterior doors to 4 ft.

4011 Series models are mounted hinge side; specify left or right handed. Nonsized cylinder is adjustable for interior doors to 4 ft. 6" and exterior doors to 3 ft. 6". Tested for 10,000,000 cycles without failure.

4040 Series can be mounted hinge side, top jamb, or parallel arm on either right or left swinging doors. Nonsized cylinder is adjustable for interior doors to 5 ft. and exterior doors to 4 ft. Tested for 10,000,000 cycles without failure.

4111 Series are mounted parallel arm; specify left or right handed. Nonsized cylinder is adjustable for interior doors to 4 ft. 6" and exterior doors to 3 ft. 6". Tested for 10,000,000 cycles without failure.

Powered Door Operators

- Nonhanded
- Acceptable for fire and smoke barrier doors

Low-energy operators function as standard spring-force closers during close cycles, when door is opened manually, or if power is lost or turned off. Hold-open time is adjustable from 0 to 30 sec. If door is obstructed, motor stops and the door closes with standard closer. Include 2 radio-frequency wall switches powered by 9V batteries, 6" x 6" face plates with Americans with Disabilities (ADA) logo, and built-in 1.1A power supply. Connect to wall outlet. Rated 120VAC, 60 Hz.

Ideal for doctors' offices, retirement facilities, schools, churches, and other applications where noise may be a concern.
