Healthcare HD TVs

High-definition (HD) televisions for healthcare settings can withstand frequent, heavy use in hospital rooms, assisted-care facilities, and similar environments. They typically come with digital rights-management (DRM) technology and may be able to integrate with pillow speakers, education content systems, and other compatible technology used in patient-care facilities.

Note: Pro:Idiom is a digital content protection system tailored for the hospitality industry. It allows a central decoder in a hotel or facility to decrypt video from a headend or satellite feed and re-encode it for secure delivery to TV sets in each room.

Correctional and Behavioral Health Facility HD TVs

High-definition (HD) televisions for correctional and behavioral-health facilities are typically tamperproof and have a clear body so that guards and staff can check that the TVs aren't being used to hide contraband. These TVs are used in prisons, behavioral-health institutions, and similar facilities where inmates or patients are at risk of harming themselves or others.

Prosumer and Entry Level Commercial HD TVs

These commercial high-definition televisions provide longer life in frequent, high-use settings than standard consumer TVs. They are suitable for use in a range of commercial settings, such as break rooms.

Note: Pro:Idiom is a digital content protection system tailored for the hospitality industry. It allows a central decoder in a hotel or facility to decrypt video from a headend or satellite feed and re-encode it for secure delivery to TV sets in each room.
