Fire Helmets

- Fits head size 6¾" to 8¾"
- Meet NFPA 1971-2000
- Fire helmet accessories are available online, see Grainger.com

Composite helmets offer both thermal and impact protection, resisting both high heat and flames. Soft black Nomex chin strap features one-hand, quick-release buckle and postman slide for quick removal and adjustment. Shell-release (system) allows escape from snag

hazards if helmet is knocked off or hung up. Defender visor offers eye protection, plus it's easy to use, maintain, and change out.

660C Metro—Withstands various applications including firefighting, technical rescue, and EMS and confined space. Proprietary tube-lock system helps absorb impact.

1010 Traditional—Ideal for structural and proximity firefighting. Flexes with impact to absorb energy.

Firefighting Hoods

- Meet NFPA 2018 Edition

Face and neck protection is offered in materials and styles to suit your department's specific needs. Hoods have ½" elastic sewn into the face opening for snug fit, bar tacks on stress points, and double-needle banded bottom. Seams are flatlock-stitched with Nomex thread for comfort and durability.

Fire and Rescue Gloves

SKINS Rescue General Purpose Gloves—Material is double thick around the thumb, with keystone thumbs angled toward the palm for greater dexterity. Wash and wear.

Wildland/Rescue Gloves—The keystone double-thick thumbs are angled toward the palm to add dexterity. 4" W Nomex wristlet keeps hot debris from entering gloves.

- Meet NFPA

FDP Structural Firefighter Gloves—Sealed against liquids with a laminated Gore PTFE barrier/thermal liner and sealed seams. Abrasion-resistant; cowhide gloves are also fire-retardant and heat-resistant.

- Meet NFPA 1971-2013

SHELBY®

Flex-Tuff Specialty Gloves—Curved shell has a tapered index/trigger finger and flexible thumb and other fingers for dexterity and articulation. Crosstech barrier/thermal liner with a secondary thermal layer for improved heat protection.

- Meet NFPA 1971-2013
