

## Men's Shoe-Fit Insulated Fire Boots

- Meet NFPA 1971, Current Edition

Fire-Dex FDXR100 Shoe-Fit Firefighting Boots are built to provide waterproof protection and thermal wool insulation for firefighters in the field. They feature rubber construction with reinforced rubber

shin guards and heels. Steel toes, plates, and shanks offer rugged protection. Integrated pull-on loops help to enable easy donning/removal. Articulating louvers on side tread offer added traction, and the sole tread pattern is designed to help push water outward. Reflective trim provides added visibility.

## 3D Firefighter Gloves

- Meet NFPA 1971-2013

Firefighters Gloves are designed to deliver natural movement, better grip and tactility, and excellent dexterity. These wristlet gloves offer a Kangaroo leather palm and Cowhide leather back material. PIVOT-THUMB and formed knuckle guard provide natural, anatomically correct thumb-to-finger movement. These gloves have a Nomex/Kevlar thermal lining for heat and slash protection. CROSSTECH

inserts provide long lasting protection against hot water, blood, body fluids and common chemicals by resisting damage due to flexing, abrasion and heat exposure. The style has rounded fingertips, curved thumbs and fingers, and exclusive TRU-3D: complete fourchettes on all sides of every finger and thumb. K2351 gloves are constructed with 2 layers of Nomex knit at the wrist for additional protection.

## Structural Firefighting Gloves

- Black/gold color
- Meet NFPA 1971-2018

Gloves feature a pre-curve design, durable Eversoft thermal split cowhide leather on top and palm of the gloves, and a keystone thumb. Lined with Kovenex for thermal and flame resistance. Includes a waterproof,

breathable Porelle insert. Has Kevlar stitching construction for maximum structural durability and seamless fingertips offer flexibility and dexterity.

**Gauntlet cuff** has eversoft thermal split cowhide leather. **Wristlet cuff** offers two-ply Kevlar construction with leather pull tab.
