Electromagnetic and Keyless Access Control Locks

Use in a wide range of facilities, including large hospitals, small clinics, campus universities, single buildings, or entire office developments. Programmable keypads feature on-board controller access to simple electrified or battery-powered locking devices.

C0100 Series Offline Electronic Lock—Provide customized levels of security at each door, with a large selection of credentials and networking options. Allow addition/deletion of users, usage tracking, and data management without installing a facility-wide network. Upgrade to a network solution by replacing the network module, not the entire lock. Also provides an easy way to manage people, audits, locks, and other network panel interface devices for simple access control. Allows up to 5000 user codes and has a 6 pin full cylinder. Everest C123 Keyway with Sparta lever. Satin chrome finish. Includes (4) AA batteries.

Access Credential Reader—Provide flexible building security and security management solutions. Magnetic stripe card reader is full-swipe for maximum readability. Linked access available with keypad with card or iButton. Fully compatible with ABA Track 2 or Track 3 standards.

Keyless Access Control Locks—Illuminated keypad locks offer up to 19 individual user codes to provide secure access; program right at the keypad. Include 2 backup keys for emergency egress. Fit left- and right-handed doors from 1 3/8" - to 1 3/4" -thick. All-metal chassis and escutcheons with wear-resistant silicone rubber buttons. Include 9V battery and low battery indicator light.

Electronic Access Control Locks with Audit Trail, Grade 1

- Key override; key-in lever cylinder (included) or SFIC cylinder (not included)
- Weather-resistant; operating temp.: -31° to 151°F
- Up to 300 users, 9000 audit events
- For 1 3/4" - to 2 1/4" -thick doors; 2 3/4" backset
- Include 4 AA batteries

Event audit trail provides a printable time/date-stamped log of all door activity. Features include audible low battery alert, timed relock, codes for 1-time use, antitamper function (invalid entry), and total user lockout codes. Lock can be programmed and audits downloaded via software and laptop PC (not included). Locks have a vandal-resistant all-metal keypad. Class/storeroom function requires no code for egress. Unique Lectro Belt eliminates wiring to or through the door. Retrofit standard ASA 161 door preps.
