## Alarmed Exit Devices

- 95dB alarm
- Include mounting hardware and battery.

Applying pressure to the push bar retracts the latch from the strike plate and sounds alarm until reset with included key. Aluminum housings. Paddle- and bar-activated deadlatches, a low-battery indicator, and a deadlocking latch that resists tampering. Deadbolt extends 1" into strike plate. Nos. 1U111 and 1U036 require a rim cylinder (sold separately).

## Magnetic Exit Door Alarms

Help deter unauthorized use of emergency doors by sounding an alarm when door is opened. Alarm surface mounts on the interior side of the door, and magnetic contacts mount on the door frame. Alarms are reversible for right- and left-hand doors. For indoor use only; mounting hardware included. Key-controlled alarms require a mortise cylinder lock (sold separately).

**Standard**—Have a low battery warning. No. 1U109 has an amber strobe light for visual identification. Nos. 1U112 and 1U109 include a battery pack; No. 1ABN3 includes a 9V battery.

**Slimline**—Narrow design takes up less space. No. 6JD82 mounts on inside of door and has a programmable 6-digit keypad to arm and disarm the alarm; No. 6JD81 mounts on the outside. All include 9V battery.

## Aluminum Door Hardware

**Adams Rite**  
ASSA ABLOY

**Deadlatches**—A reverse key turn while the bolt is held retracts the latchbolt, allowing 2-way traffic. When latchbolt is extended, exit-only traffic is allowed. Compatible with any standard 1½x2" mortise cylinder where an MS cam is installed. An auxiliary bolt helps prevent shimming.

**Deadlatch Handles and Paddles**—Include an activator camdisc that mounts on the handle escutcheon and fits into the cylinder hole of the latch.
