

Threaded Rod Hangers

- Heat-treated, case-hardened steel
 - Zinc-plated for corrosion resistance
- Hardened steel prevents snapping during installation or in high-stress environments 1-pc. design ensures a strong hold between screw and connector.

Notes: Nut drivers sold separately, this page.

Threaded rods are sold separately; see pages 2144, 2145.

SAMMYS®

UNC anchors can be used to hang threaded rod from wood, steel, concrete, and metal deck. Color-coded to make it easy to select the correct-size Sammys nut driver; sold separately, this page.

Sammy X-Press—Anchors expand upon installation to stay in place without a retaining nut, for use where the back of the installed fastener is not accessible. Install quickly with Sammy X-Press It Installation Tool 36C177, sold separately, this page.

DEWALT®

Wood and Steel hangers require no pre-drilling. Wood hangers have a Type 17 gimlet to help reduce splitting. Concrete hangers 54PD63, 54PD64, and 54PD65 are internally threaded; 54PD61 and 54PD62 have external 3/8" thread for direct attachment to anchors.

STRONG-TIE®

Install quickly with no special installation tools. Hanger anchor 4XFX3 is designed for hanging installations. Coupler anchor 4XFW8 is designed for concrete foundations.

ROD HANGER DRIVERS AND EXTENSION ROD

Sammys® drivers are color-coded by size for quick selection on the job.
