## **LENDEX** Storrett<sup>®</sup> Wide Metal Cutting Band Saw Blades

Bimetal tipped

Blade widths of 1 ¼" or more for extended use in large band saws for production and manufacturing tasks. **General purpose blades** cut mild steel, stainless steel, aluminum, and softer metals such as brass. They are common on production lines and fabrication operations where a variety of materials are cut so blades don't have to be changed between cuts. **Structural shape blades** cut steel profiles such as tube and I-beams where the blade passes through different thicknesses of material in a single pass.
