Arbor-Mount Crimped Wire Wheels

For cleaning rust, scale, dirt, and paint; deburring; edge blending; roughening for adhesion; flash removal of rubber and plastic; finishing for appearance; and finish preparation prior to painting or plating.

Medium Brush Face—Greater fill density creates more aggressive brushing action.

Narrow Brush Face—Produces flexible brushing action; conforms to uneven surfaces or irregular shapes. 4" wheels are used on straight grinders.

Wide Brush Face—Heavy fill density creates minimal flexibility. Fast aggressive cutting covers more surface area in a single pass.
