Multipurpose Greases

CRC®

General Purpose—For bearings and on cables, chains, latches, machinery, open gears, and overhead door tracks.

CITGO

Premium Lithium EP—Lubricates journal and antifriction bearings.

Lithoplex® MP—Helps minimize wear in heavily loaded components. Offers corrosion and oxidation resistance.

Lithoplex® CM and HM—Provide wear protection in construction and mining applications. Polymer-fortified for improved adhesion and water resistance. Lithoplex CM has 3% MoS₂. Lithoplex HM has 5% MoS₂.

Lithoplex® RT—Tacky, moly-free formula provides good adhesion and water resistance.

JET-LUBE

MP-50 Moly Paste—Lead-free, water-resistant low-friction grease helps prevent corrosion.

Temp-Guard—Contains graphite and molybdenum disulfide for low friction and extreme pressure capabilities.

MOBIL

Mobilith SHC 220—Lubricates at temperature extremes; rust-, corrosion-, and oxidation-resistant.

Mobilith SHC—4ZF48 is for extreme pressure applications. 4ZF49 is for grease-lubricated rolling-element bearings in electric motors.

Mobilgrease XHP 222—Provides lubrication and oxidation stability plus rust, corrosion, and water resistance. Use for automotive, construction, marine applications and farm equipment.

Mobilgrease XTC—Resists oil separation in high-speed flexible gear and grid coupling applications.

Mobilux EP 1 and 2—EP 1 can be pumped at low temperatures. EP 2 is recommended for antifriction and plain bearings, bushings, and pins under normal operating conditions.

WD-40® SPECIALIST®

High Temperature—For high-speed bearing in high-temperature applications with heavy mechanical loads.

Extreme Pressure—Offers protection against wear and high loads in heavy-duty applications

Marine Grade Water Resistant

—For moisture and corrosion protection for equipment that's exposed to the damp weather conditions

B'LASTER

Waterproof Marine Grease—Provides protection, even with extended exposure to saltwater and saltwater mist.

Heavy-Duty Grease—Protects and lubricates in temperatures up to 500°F. Great for automotive, construction, mining, and farm equipment.

Extra-Tacky Red Grease

—Provides anti-wear and extreme pressure protection, in temperatures up to 550°. Rust- and -corrosion resistant.

Pro-Grade Multipurpose Grease

—Water-resistant formula provides lubrication under moderate loads. Protects against rust and corrosion.

SUPER LUBE

O-Ring Silicone Grease—For lubricating, sealing, and conditioning O-rings and other regulator and valve system components.
