

Way Oil
4ZF13

Spindle Oil
5ZN14

Machine Maintenance Oils

Way Oils—Dual-purpose hydraulic and way oils are recommended when extreme precision or slow speeds make it necessary to eliminate stick-slip or chatter. Approved by major machine tool builders such as Cincinnati Milacron, Okuma, and Bijur. Minimize wear. Good coolant separability extends oil life.

Spindle Oils—Light-bodied, light-colored oils offer long service life and excellent antifoam and rust protection. Resist oxidation and deposit formation. For high-speed spindle, plain, and antifriction bearings in textile machines, precision grinders, and other machine tools. Effective lubrication at high speeds. Approved against Cincinnati Milacron P specifications.

Air Tool Oils and Lubricants

Almo 525 Air Tool Oil—Pneumatic rock drill and tool lubricant formulated to provide a balance of adhesiveness, yet emulsifiable enough to pick up moisture carried in oil stream.

Pneumatic Tool Oil—Quickly removes gum and sludge. Waterproof formula lubricates, protects, and prevents rust.

Sta-Lube Air Tool Oil—Reduces rust, varnish, sludge and acids. Increases torque on pneumatic equipment.

Bio-Air Tool and Bio-Food Grade Air Tool Lubricants—Designed for use with rotary and reciprocating air tools.

Air Line Lubricant
40P263

Food Grade Air Tool/Air Line Oil and Lubricants

■ NSF 1 Rated

Air Tool Pneumatic Lubricant—Oil's blended rust and corrosion inhibitors and a synthetic base fluid absorb water and minimize ice buildup and frost in air tools; reduce wear and allow operation in temperatures as low as -40°F.

Air Line Lubricants—For pneumatic equipment and air-operated tools in food, beverage, and packing operations. 40P261 is for medium equipment and hand-held tools. 40P263 is for large equipment and jackhammers.
