Air Tapping Arms

Arms support the weight of their tapping tool and absorb torque to reduce user fatigue and injuries, especially when performing repetitive actions. They position the tool at the end of the arm and balance it for a weightless effect when swiveling the tool or moving it up, down, back, and forth. The tool holds a range of tap sizes to cut different thread sizes. These arms mount to a worktable, cart, or other flat surface.

Fuel Actuated Cordless Pin Nailer

- Cordless Tool Kit Contents: (1) Bare Tool, (1) Battery, (1) Charger

Powered by a compatible Ramset 6V battery and fuel cell. Fuel cells contain combustible gas that the nailers use to generate force for driving nails. They provide driving power that is comparable to air-powered nailers. Nail guns hold nail strips or coils that feed nails one after the other to speed installation in framing, roofing, cabinetry, and flooring applications.
