Air-Powered Vacuum Guns and Accessories

Create suction to draw debris through the vacuum nozzle and into a removable collection bag, or attach to a hose to collect debris in a larger container. The handpiece connects to a compressed air supply and a trigger or other actuator that starts and stops suction.

Combination Vacuum and Air Gun—Can switch between suction and blowing modes so one tool can blow away material and vacuum up debris.

Air Excavation Tools and Accessories

Connect to a compatible compressed air supply and deliver a high-pressure airstream to remove soil and debris, especially from areas where shovels and backhoes may damage buried utility lines. Commonly used to dig trenches for new underground lines, uncover buried lines to make repairs, and clear cracks and joints in pavement before sealing.

Static-Eliminating Air Cannons, Air Guns, and Accessories

Emit an ionized airflow to neutralize static charges and remove dust and debris from objects and surfaces. They prevent dust from sticking to surfaces, stop parts from clinging together, and eliminate static discharge which can damage sensitive electronic components.
