

Fume Extractors

- Filters not included with all models; select primary filter pkg. based on application needs

Multistage filtration removes smoke, dust, solvent fumes, lab fumes and other contaminants to improve air quality in a variety of small- to medium-size industrial applications.

For additional fume and dust collectors, see pages 2362 and 2408.

Downdraft Table Air Cleaning & Dust Collection System, For Smoke, Dust, Fumes, Contaminants	Portable	1250	1	72	78"	33"	25"	Black	Filter Gauge, Removable Side & Back Shields, Self-Cleaning Filter	SCDD-1250	35ZX04

Ceiling-Mounted Air Cleaners

- 90 to 95% efficiency

Remove tobacco smoke, dust, lint, dirt, bacteria, and other air contaminants. Units feature direct-drive blowers and Auto-Off timer. Filter status indicator helps assure max. efficiency. Use multiple units to accommodate larger areas. Gray powder-coated finish.

Fume Collectors

- Rated at MERV 13

Collectors are suitable for low-production manual welding applications. Feature spark arresstance and easy-to-maintain filters.

Series 100—Fume arms have external support for increased air draw. Manual compressed air filter cleaning.

Series 200—Stand-alone weld booths feature simple plug-n-play setup. Feature a large work surface, pulse filter cleaning, and side panels.

Series 300—Compact, space-saving units have a fork pocket base. The large air draw. Pulse filter cleaning.

Series 300

Fume Extractors

LINCOLN

Automatic start/stop current sensor extracts only when needed, extending motor life. Choose low or high extraction settings.

Miniflex®—Made for light-duty welding applications, small size.

X-Tractor®—The high-efficiency polyesther filter can be cleaned using compressed air with the rotary air jet system. Includes 16-ft. flexible hose, 2 spare sets of motor carbon brushes, and 12-ft. power cord.

Mobiflex®—Ideal for light- to medium-duty use. An internal spark arrestor prevents sparks from reaching the filter. Do not use with cutting or arc gouging operations.

MILLER

Nanofiber filter technology captures submicron welding particles.

FILTAIR® 130—Adjustable airflow. Includes 20-ft. power cord and 8-ft. collection hose.

FILTAIR® MWX—Delivers MERV 15 filters that capture submicron weld fumes and provide a longer holding capacity.

FILTAIR® SWX-S—Designed specifically for welding applications with higher arc times, this telescoping-arm unit can be mounted on a wall or column. Includes a self-cleaning filter and all mounting brackets. MERV 15 rated.

FILTAIR® SWX-D—Similar to the SWX-S, but with a disposable filter, this unit is designed to be used in lighter manufacturing applications with lower arc times. Includes all mounting brackets.
