

High-Visibility Large-Frame Air or Water Spring-Return Hose Reels

- Hose included
- Max. operating pressure: 300 psi
- Blue reel color
- Brass swivel

Large-frame reels feature a larger chassis and frame that hold longer lengths of hose, or shorter lengths of large diameter hose. These low-pressure, single-pedestal reels mount to a wall, floor, vehicle, or an overhead position, and have a movable guide arm. The dual-axle support system increases stability and reduces vibration during use. These reels with movable arms are commonly used with air or water hoses for washdowns, lubrication, and in auto and fleet service centers.

Fuel Spring-Return Hose Reels

Fuel hose reels hold various lengths and diameters of hose for fuel delivery systems including diesel exhaust fluid, gas, and liquid propane. **DEF hose reels** hold hoses that dispense DEF (diesel exhaust fluid) for late model diesel engines and for emerging greener DEF service stations. **Gas hose reels and hoses** are found in utility, ground support, and bulk liquid handling transport services to convey gasoline.
