Hose Barbs, Menders, Ferrules, Crimper and Die Modules

Provide fast, easy hookup for bulk hose pipe thread fittings.

BEADED HOSE BARBS

Flat area between the barb and the body fitting allows the greatest area possible for clamping.

HOSE MENDERS

Connect on any 2 hoses or a broken hose that meets dimensional specifications.

BRASS HOSE FERRULES

Long-barrel ferrules crimp air hose to barb to form a permanent assembly.

HOSE CRIMPER

Portable or workbench-mounted crimper secures standard brass ferrules onto general purpose or heavy-duty air, water, and material hose for a complete hose assembly. Includes 5 die sets.

DIE MODULES

Hardened steel ribbed die sets can be used for crimping 1/4" single-braid through 3/8" double-braid compressed air line hose or standard air line cables.

Multipurpose Reusable Hose Fittings

■ Max. psi: 250

They have a male NPT end that attaches to pipe and a genderless end that screws onto a hose end and is secured with a wrench. Reusable hose ends are used in multipurpose hose assemblies to convey air, water, or chemicals and can be removed and used again.

MULTIPURPOSE REUSABLE HOSE MENDERS

Commonly used to repair and connect damaged multipurpose hoses in the field. These fittings have two male ends that screw onto hose ends and are tightened with a wrench to create a leak-resistant seal. Reusable hose menders are used in multipurpose hose assemblies to convey air, water, or chemicals and can be removed and used again.
