

Brass and Polybutylene 1-Touch Fittings

- Operating pressure range: -15 (vacuum) to 145 psi
- Temp. range: 23° to 140°F

Low disconnecting force helps prevent collet and chuck from biting into and damaging tubing. Polybutylene/brass body and threaded portion can turn independently of one another for use in confined spaces. Use with polyurethane, polyolefin, nylon, and PTFE tubing. Can be used for positive air pressure as well as vacuum for actuators, air preparation, and directional control valves.
