Garage Door Dry Lubricants

- **Flammable** Leave a dry film that protects rolling door mechanisms
- **Not NSF rated** against water damage or corrosion.

Container Size	Lubricant Base	Primary Additive	Operating Temp. Range	Lubricant Color	Odorless	Item No.
3-In-One						
16 oz Aerosol Can	Mineral Oil	Silicone	-40° to 392°F	Colorless	Yes	3DVF7
Blaster						
5 oz Aerosol Can	Silicone	No Additives	0° to 120°F	Colorless	Yes	48GG08
16 oz Aerosol Can	Silicone	No Additives	0° to 120°F	Colorless	Yes	10N778
Liquid Wrench						
16 oz Aerosol Can	Mineral Oil	No Additives	20° to 122°F	White	No	54YK45

Lock Dry Lubricants

- **Flammable** These powdery, solid substances penetrate quickly into stuck or frozen locks to release them, and they provide protection against further corrosion. They don't attract dust or dirt and won't create grime or leave wet residue in the lock.
- **Not NSF rated**

Container Size	Lubricant Base	Primary Additive	Operating Temp. Range	Lubricant Color	Odorless	Item No.
3-In-One						
5 oz Aerosol Can	Mineral Oil	PTFE	-50° to 500°F	Colorless	Yes	39EL86
CRC						
2 oz Aerosol Can	Graphite	No Additives	0° to 120°F	Black	No	48TA27
Liquid Wrench						
10 oz Aerosol Can	PTFE	No Additives	-20° to 115°F	White	Yes	54YT62

Inner Slide Dry Lubricants

- **Flammable** Increase slide motion on forklift rails and helps protect the rails against rust and corrosion. The primary additive is molybdenum.
- **Not odorless**

Container Size	Lubricant Base	Operating Temp. Range	Lubricant Color	Item No.
16 oz Aerosol Can	Organic Solvent	0° to 325°F	Black	36F364

Electrical Dry Lubricants

- **Flammable** Coat electronics with a dry film that resists and repels moisture. They can be applied to nonenergized equipment in wet or harsh environments for waterproofing. They should not be applied to energized equipment.
- **NSF rated H1 for incidental food contact**

Container Size	Lubricant Base	Primary Additive	Operating Temp. Range	Lubricant Color	Odorless	Item No.
16 oz Aerosol Can	Silicone	No Additives	-40° to 400°F	Colorless	No	4YPJ9

Penetrating Lubricants

Loosen fasteners or bolts that are stuck or frozen in place so they can be removed or separated. They seep into crevices or small spaces between threaded parts to release them. They can displace moisture and prevent corrosion between fasteners. Penetrating lubricants evaporate more quickly than other lubricants, so they are better used for short-term lubrication.
