## Machining Coolants

### SEMISYNTHETIC

**SS-405L**—For machining or grinding.

**ULTRACUT® 375R**—Compatible with CNC machining.

**MicroSol® 690XT**—Perform in high-pressure applications, offering cooling and mechanical lubricity.

**E206**—Effective on ferrous and nonferrous metals.

**E850**—Provide corrosion protection for ferrous and nonferrous metals.

**E925**—Deliver exceptional surface finish.

**SC520**—For high-speed milling and turning operations.

**VP Series**—Resistant to ionic shock and hard water. For high pressure coolant applications.

**VP Tech P**—High content mineral oil with excellent bio-resistance.

**Aerotech B**—For use in aluminum machining and steel applications. Resistant to ionic shock and hard water.

**VP Tap**—For easy cleaning of parts and tools.

### SILICONE

Remove oily residue, soap deposits, and scum that reduce coolant life span.

### SYNTHETIC

**Carbide PowerGrind**—Prevent chemical damage to carbide in grinding applications.

**G-25J**—For Blanchard grinding of cast iron and other ferrous metals.

**G-1066D**—For diamond wheel grinding and slicing.

**PowerSaw**—For sawing operations in moderate to heavy-duty application.

**PowerChip 2000**—Works well in hard-water areas.

**SN-100A**—Resist bacterial growth, fungal growth, and rancidity.

**Vytron N**—General-purpose formula prevents rancidity.

**C115**—For cast iron and mild steels.

**C270**—Use in form grinding, drilling, tapping, and reaming operations.

**C350**—Provide corrosion resistance on aerospace aluminum alloys, titanium, Inconel®, brass, and high-strength alloy steels.
