

55CP81

2- and 3-Pc. Combination Units

- Remove particulate and water down to 5 microns
- Max. pressure: 150 psi (polycarbonate bowl), 250 psi (metal bowl)
- Max. temp.: 125°F (polycarbonate bowl), 150°F (metal bowl)

WILKERSON

Two-piece design integrates filter/regulator and lubricator into a single unit. Three-piece design combines filter, regulator, and lubricator. Units with a metal bowl and sight gauge provide visibility into the bowl. Units with a polycarbonate bowl have a guard with multiple viewing slots into the bowl. For replacement filter elements, see pages 2478, 2479.

Parker

General Purpose Filters

- Remove impurities down to 5 microns
- Feature a heavy-duty bowl with sight glass, manual drain, and a larger surface area for longer life. Heavy-duty units come with an automatic drain.

Note: Should not be located in areas subject to direct sunlight, direct impact, or temperature outside rated range. Incompatible with chlorinated hydrocarbons, ketones, esters, and certain alcohols. Not for use in air systems where compressors are lubricated with fire-resistant fluids such as phosphate ester or diester. Should not be used where strong acids or bases are present or in salt-laden atmospheres.
