

General Purpose Filters

Help extend air tool service life when installed upstream from the regulator and lubricator. Protect against contamination by rust, scale, condensed water, and other debris.

2- and 3-Pc. Combination Filter, Regulator, and Lubrication Units

- Include gauge All units come preassembled. Compressed air filters are designed to remove airborne solid and liquid contaminants. Regulators provide controlled, consistent air pressure. Lubricators help ensure that pneumatic devices receive the required lubrication.
