

## Air-Only Spring-Return Hose Reels

Retracts hose onto the reel without an external power source

Reels hold hoses that supply air for tools, sprayers, and services from compressed air, and breathable air for respiratory applications with low- or high-pressure breathing systems. Ratchet and pawl locks desired hose length into place.

## Lightweight Air or Water Spring-Return Hose Reels

Mount to a floor, wall, or ceiling

These low-pressure reels are designed for less demanding industrial or commercial use. The spool is made from engineered plastic for long service life. Reels include a guide arm that adjusts to seven positions. They are commonly used with pneumatic tools, in lubrication, and with general industrial air/water services.

## Standard Air or Water Spring-Return Hose Reels

These single-pedestal reels include standard low-pressure hose for air or water service only. Reels mount to the floor, wall, or ceiling, and include an adjustable guide arm. They are used with air or water hoses for pneumatic tools, in service centers, and at construction sites.
