In-Wall Drinking Fountains & Bottle Fillers

- Indoor use
- 115V AC

Single Drinking Fountains are self-contained and mounted fully or semi-recessed in walls with limited depth.

Two-Level Drinking Fountain is fully recessed in the wall and offers bi-level stations to accommodate users of varying height.

Standalone Bottle Fillers are fully recessed within walls, and are ideal for narrow walkways and small spaces. Bottle fillers reduce single-use plastic bottles.

Freestanding Drinking Fountains & Bottle Filler

- Indoor use
- Non-filtered
- 115V AC

Units are mounted directly to the floor and do not require a wall or other vertical surface for installation, and are electric corded. They are commonly installed next to a wall to allow for easy integration into existing plumbing. Top

push button actuation, except **49T427** is push button on bubbler. **3EMY7** includes back panel for floor-standing installation. **4CE97** features a glass filler spout for filling water containers with hot water and is activated by a tap-style lever. **3EMZ1** includes a hands-free glass filler. **787CW5** includes water filter and is ADA compliant.

Outdoor Drinking Fountains & Bottle Fillers

- 115V AC (electric corded models)

Drinking fountains and bottle fillers are built to withstand tough weather conditions. The stainless steel exterior are ideal for high-traffic areas, such as parks, pool decks, golf courses, schools, and work campuses. They are available for outdoor wall-mounting or as freestanding

units with single or two-level access to accommodate users of varying height. **33KJ65** two-level fountain with bottle filler is offset to allow multiple users to drink or fill water bottles simultaneously. An additional pet fountain features slow drainage for easy drinking.
