## Counter-Mounted Kitchen & Bar Sinks

Durable, stain-resistant stainless steel sinks are used in commercial food preparation, hospital and school cafeterias, and restaurants and bars. **Drop-in Sinks** have a protruding edge that sits above the countertop and overhangs the hole in the counter to keep the sink in place. They include pre-cut or knockout holes for 4" center-set faucets. **Undermount Sinks** are installed from under the countertop and are held in place with brackets to create a continuous flow from sink to countertop. **Sinks With Faucets** have 4" mounting centers and gooseneck faucets that mount to the deck.

## Freestanding Kitchen & Bar Sinks

Utility sinks, or scullery sinks, are made of stain-resistant stainless steel, and have a deep bowl for dishwashing and rinsing glasses, dishes, or large pots. They are typically used in commercial kitchens in school cafeterias, hospitals, and restaurants. **Sinks With Faucets** have 4" mounting centers and low-arc faucets that mount to the deck. **Sinks Without Faucets** have 8" mounting centers (except 13G617, 13G618, and 13G594 are center-set), in the deck or splash. **Drainboards** prevent spills and provide a food preparation or dish drying surface.
