Nutriflo PVC Food & Beverage Hose Assemblies with Smooth PVC Cover

- Temp. range: -25° to 230° F
- Safety factor: 4:1

Nutriflo PVC (polyvinyl chloride) food and beverage hose assemblies have a smooth PVC cover and are suitable for transferring dry foods and liquids in gravity-flow and vacuum-service applications. These hoses can handle higher pressures than Nutriflex PVC food and beverage hoses with corrugated covers. They are well suited for transferring raw and pasteurized milk and other dairy items with high water content.

Bulk Food & Beverage Hoses

Noncontaminating hoses are constructed with FDA and USDA-compliant food grade materials. Hose features static wire and is suitable for dry food transfer. Heavy-duty hose is noncorrugated and has higher pressure.

Nutriflex PVC Bulk Food & Beverage Hoses with Corrugated PVC Cover

Nutriflex PVC (polyvinyl chloride) bulk food and beverage hoses have a corrugated PVC cover and are designed for transferring dry foods and liquids in gravity-flow and vacuum-service applications. These hoses are more flexible than Nutriflo PVC bulk food and beverage hoses with smooth covers. They are well suited for transferring raw and pasteurized milk and other dairy items with high water content.
