SPEAKMAN

Provide a fixed point for seniors or people with mobility issues to hold onto for balance while lowering and lifting themselves or entering and exiting showers.

Standard—Mount to walls in bathrooms or showers to provide support and stability. **Anti-Microbial**—Feature a surface that resists bacteria and germs in bathrooms and showers where mold and mildew are

of concern. **Ligature-Resistant**—Have rounded edges and a symmetrical design that removes any attachment points that may support weight and allows mounting to walls in different orientations. Solid bars are easy to clean and typically used in bathrooms at behavioral- and mental-health institutions or similar facilities where inmates or

patients may be at risk of harming themselves.

Wall- & Floor-Mounted—Anchor securely to both walls and floors in bathrooms and showers. **Safety Rails & Folding Grab Bars**—Fold up or down when they're not used to save space in confined areas near bathroom sinks or toilets. **Combination Shower Slide**—Serves as a fixed point to grasp for balance and stability, and allows height adjustment of hand shower holder to desired location.

Bathroom Mirrors

Standard—Often used in bathroom areas, and offer a clear reflective surface for grooming and other personal-care tasks.

Tamper-Resistant—Withstand impacts, scratches, and vandalism. Mount to walls with hardware that conceals attachment points to prevent theft and removal in schools or other public bathrooms.

Non-Glass Security—Surfaces can't be shattered and used as a weapon. Often used in bathrooms at behavioral- and mental-health institutions or similar facilities where inmates or patients may be at risk of harming themselves or others.

Makeup—Round mirror provides a magnified reflection for detailed grooming and personal-care tasks.

Mirrored Medicine Cabinets—Mirrored surface with shelves behind to store medicine, toiletries, first-aid supplies, and other items. Mount to walls or recessed mounting where a hole is cut in the wall to accommodate them.
