PLUMBING **Threaded Uncoated Black Steel & Iron Pipe Fittings**

ANVIL

readed Uncoated Black Steel & Iron Pipe Fittings, High, Extra Strong & Extreme Pressure Extreme pressure instrumentation: (3001+ psi). Works with air, natural gas, and oil

Class 6000 and Class STD (standard): High-pressure (1000-3000 psi). Works with oil

and natural gas ap	plications.								Parker

Socket Weld Uncoated Black Steel & Iron Pipe Fittings, Class 3000 & 6000

- Female connections

Connect with pipe to transport natural or propane gas, water, steam, and air to residential, construction, and manufacturing applications. Fittings attach by inserting pipe into the recessed area of the fitting. Pipe and the fitting are square cut for easy fillet welding and installation. These fittings are welded to the same thickness as unthreaded pipe. They are also known as black malleable iron and are made from corrosion-resistant ungalvanized steel with a scaly, dark-colored iron oxide coating.

Class 3000 medium- to high-pressure: (300-3000 psi), Ideal for petrochemical, pulp, paper, and shipbuilding applications,
