ANVIL

Grooved Ductile Iron Pipe Fittings, Clamps & Flanges, Class 150

- Ductile iron material
- Max. operating pressure: 300 psi @ 150° F, except end caps are 1000 psi Orange color
- Tees read: run x run x outlet

Fittings and flanges are commonly used in rigid pipe systems, above-ground pipe installations, and in tight spaces including subfloors, crawl spaces, trenches, and tunnels. Grooved ductile iron is lighter, stronger, and more durable than cast iron. Iron absorbs vibration, handles stress without breaking, and works with water, diluted acids, alkali solutions, oil-free air, and other chemicals.

Grooved fittings combine roll-grooving and two-bolt coupling designs in a joint that resists external forces without special supports or expansion joints, and help maintain secure seals under both positive pressure and vacuum conditions. Grooved connection.

Threaded outlet pipe clamps are grooved and fit around pipe lengths similar to a saddle. They include a branch outlet that maintains a leaktight seal under both positive pressure and vacuum conditions. Grooved x grooved x NPT connection.

Grooved flanges provide easy access for cleaning, inspection, and modification. Flanged x grooved connection.

GRUVLOK

Ductile-Iron Gaskets and Lubricants

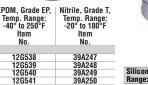

Gasket material properties as designated in accordance with ASTM D2000.

Note: EPDM Gaskets not for use in petroleum applications.

Gaskets-EPDM Grade EP gaskets are for use with alkalies, dilute acids, salts, and water. Not for use with gases, hydrocarbons, and oils. Nitrile Grade T gaskets are for use with mineral oils, petroleum products, vegetable oils, and air contaminated with petroleum oils. Not for use in hot water applications. NSF Certified.

Silicone Lubricants—Waterproof and remain effective at extreme temperatures. Permit pipe ends to reposition themselves. Nontoxic and not petroleum based.

GRUVLOK

Ductile-Iron Grooved Butterfly Valves

- Max. pressure: 300 psi
- Temp. range: -40° to 230°F

Corrosion-resistant stainless steel stems have a secondary seal that provides a lifetime lubrication chamber. With EPDM liner and 4 bolt holes.

Note: Not for use in petroleum applications.

Lever-Operated—Have lever handles; maintain a constant leaktight stem seal regardless of disc position. Meet MSS SP-67, except 3DVX7, 3DVY3, and 3DVY4 are UL Listed and FM Approved.

Gear-Operated—With 2 internal switches: 1 is wired for supervisory service; the other is for use as an auxiliary switch. Switches are rated for 11A at 125/150VAC; 0.5A at 125VDC; 0.25A at 250VDC. UL Listed; FM Approved.
