

Polypropylene Compression Tube Fittings

■ Max. operating temp.: 212°F

Polypropylene (PP) compression tube fittings are suitable for use with LDPE, HDPE, and polypropylene tubing in potable water, food, cleaning, water purification, car wash, and fiber optic applications. PP fittings offer impact and abrasion resistance strength, surface hardness, plus resist a variety of acids, alkalis, and solvent solutions. These fittings include preassembled bodies, nuts, and sleeves for quick installations. Sleeves grip tubing as the nut tightens compressing the sleeve for a tight seal. Fittings connect without tools.

	Connec.: Compression x ...	For Tube OD	Pipe Size	Overall Length	Max. Operating Pressure	Series	Item No.

Fully Polished 3A Sanitary Tube Fittings for Food & Dairy

■ Interior/exterior finish: 32 RA / 32 RA

Sanitary tube fittings meet 3A Sanitary Standards to offer cleanliness and sterility. These fittings resist heat and corrosion and are fully polished inside and out for use with high-purity or hygienic piping in food, beverage, and pharmaceutical processing. Polished surfaces are easy to clean and limit areas where bacteria might form.
