

Whole-House Drinking Water Filters

These filters connect to water supply lines entering houses or buildings to remove contaminants, protect pipes and appliances, and improve water quality.

Whole-House Drop In Water Filters are cartridges that fit inside a filter housing and are easily replaced. Filter housing required.

Whole-House Quick Connect Water Filters are cartridges with encapsulated filter media inside. Replacement is fast and easy without a filter wrench.

Whole-House Drop In 1P753

Whole-House Quick Connect 10U923

Under-Sink Drinking Water Filters

Under-Sink Drop In Water Filters install to a single water connection to reduce contaminants and improve water quality at the faucet. These cartridges fit inside a filter housing and are easily replaced. Individual filter housing is required.

Under-Sink Quick Connect Water Filters are cartridges with encapsulated filter media inside. Replacement is fast and easy without a filter wrench. Under-sink or point-of-use filters install to a single water connection to remove contaminants and improve water quality at the faucet.
