

PLUMBING

Mop Sinks, Waste Disposers & Grease Interceptors

Scan. Order. Done.
Details on page A1.

For Sink Material and Bowl Size, see page 2725.

■ 3" drain

Sinks allow personnel to rinse mops and empty bucket contents with minimal lifting or strain. They are typically mounted on or near the floor in janitorial closets or maintenance rooms. **Corner Mop Sinks** install in corners to maximize space. **Mop Sinks with Drop Front** have a shorter or notched side for easy pouring. **Mop Sink Bowls** have higher sides to contain water splashes inside the sink.

Corner Mop Sinks install in corners to maximize space. **Mop Sinks with Drop Front** have a shorter or notched side for easy pouring. **Mop Sink Bowls** have higher sides to contain water splashes inside the sink.

Food Waste Disposers

- Quiet Dura-Drive split-phase induction motors have permanently lubricated bearings
- Quick Lock mounting system for easy installation
- Intermittent-duty, except Commercial models are continuous-duty

ESSENTIAL XTR

Features SoundSeal technology for quiet operation and MultiGrind technology that provides 2 grinding stages versus 1 stage in many standard disposers. Includes a SinkTop Switch accessory with button and power to ease activation.

COMMERCIAL FOOD SERVICE EQUIPMENT

■ 1-yr. manufacturer's warranty

Note: New installations require a mounting adapter, sold separately on this page or go to Grainger.com and search for "disposer, mounting adapter."

1725 rpm, 60 Hz, with overload protection and manual reset.

BADGER SERIES

Include two 360° stainless steel swivel impellers, dishwasher drain connection, stainless steel sink flange, and self-service wrench. 31EE15 and 31EE16 include a power cord.

EVOLUTION SERIES

Stainless steel grind components ensure dependable performance. Multigrind 2- or 3-stage shredder and sound-reducing insulation. Sink baffle included.

Septic Assist, 2YB95

Bio-Charge technology injects a microorganism-rich solution that breaks down and liquefies waste for safe handling in a septic tank.

Excel, 2YB91

Jam-Sensor circuit automatically increases motor torque up to 500%.

Grease and Lint Interceptors

1WXD7

Endura models have 1-pc. plastic tank with an airtight silicone seal, easy-to-open latching system, and an innovative removable baffle design. 40D985 and 40D986 have a removable dual-screen filtration system with coarse and fine screens. Watts models are epoxy-coated steel with removable baffle and deep seal trap with clean-out. Recessed or floor mounted. Zurn grease interceptors have a Dura-Coated steel body, flow diffusing baffle, integral trap, and external vented inlet flow control. The Lint Interceptor 38UK34 separates out solids such as buttons, lint, stones, and string, and can handle up to 3 washing machines. Unit features an acid-resistant coated interior and exterior, a nonskid secured cover with removable lift handle, aluminum lint intercepting secondary screen assembly, and permanent primary straining baffle with 3/8" dia. perforated holes. Model has a high inlet and low outlet.
